Summary

Machine learning-focused BSc CSIT student with hands-on experience building and evaluating supervised learning models using Python and scikit-learn. Currently working as a QA Automation Engineer applying engineering discipline through automated UI testing with Playwright (Node.js). Passionate about applying data and algorithms to solve real-world problems. Seeking ML or software engineering internship opportunities at scale.

Technical Skills

Programming Languages: Python, JavaScript (Node.js), C, C++
Machine Learning & Data Science: scikit-learn, Pandas, NumPy, Matplotlib, Seaborn, Supervised Learning, Logistic Regression, Feature Engineering, StandardScaler, MinMaxScaler, K-Fold Cross-Validation, Train-Test Split, Confusion Matrix, ROC Curve, Precision, Recall
Databases: SQL (DDL, DML, Joins, Aggregations, Views, Normalization, Relational Modeling)
Testing & Automation: Playwright (JavaScript), Manual Testing, Smoke Testing, Regression Testing, API Testing (Postman), CSS/XPath Selectors
Tools & Platforms: Jupyter Notebook, Google Colab, Git, Trello, Confluence

Experience

QA Automation Engineer Intern Jan 2026 – Present
AdviseBridge *Kathmandu, Nepal*

- Develop and maintain automated UI test scripts using Playwright (JavaScript) for multi-page production portal workflows, contributing to improved release stability and early defect detection.
- Perform structured manual testing including smoke, regression, and beta testing cycles; document test cases in Confluence and track defects in Trello.
- Conduct API endpoint validation and testing using Postman to verify backend service correctness.
- Utilize CSS and XPath selectors for robust element handling and cross-browser UI validation.
- Collaborate closely with developers and stakeholders during feature validation cycles to ensure quality releases.

Business Analyst Intern Jul 2025 – Oct 2025
TAI Inc. *Kathmandu, Nepal*

- Conducted feasibility studies and research on churpi farming, IT outsourcing, and export-oriented business models in Nepal, producing structured analytical reports for stakeholder review.
- Collaborated with stakeholders to gather requirements and translate findings into actionable documentation and presentation materials.
- Assisted in evaluating operational and market data to support strategic business decision-making.

Education

Bachelor of Science in Computer Science and Information Technology (BSc CSIT) In Progress
Tribhuvan University – Vedas College *Kathmandu, Nepal*

- **Relevant Coursework:** Data Structures, Database Management Systems, Machine Learning, Design & Analysis of Algorithms, Web Development, Mathematics

Certifications

Data Science & Machine Learning in Python (110 Hours) May 2025 – Jul 2025
Deerwalk Institute of Technology *Kathmandu, Nepal*

- Completed intensive 110-hour training in Python-based data science and applied machine learning.
- Implemented supervised learning classification models; evaluated performance using precision, recall, ROC curve, and confusion matrix in scikit-learn.
- Performed exploratory data analysis and visualization with Pandas, Matplotlib, and Seaborn; applied feature preprocessing techniques including scaling and train-test splitting.
- Practiced model generalization and validation using k-fold cross-validation to reduce overfitting.

Additional Information

Languages: Nepali (Native), English (Professional), Hindi (Professional), Spanish (Elementary)
Technical Interests: Machine Learning, Applied AI, Data Analysis, Test Automation, Building Practical Tools from Data
